PROJECTS

Portfolio Website

- Designed and developed a personal portfolio website showcasing my UI/UX design projects, leveraging HTML, CSS, and JavaScript to create a responsive and visually engaging experience.

Marketplace app(using Material Design 3)

- Currently working on a marketplace app using material design 3 principals. My expertise lies in leveraging the vibrant color palettes, intuitive typography, and dynamic components of Material Design 3 to craft designs that seamlessly blend aesthetics and functionality.

Personal Assistant app

- Leveraging my expertise in UX/UI design, I created an intuitive and user-centered solution that seamlessly integrates into users' lives.

Shopping App - Transforming Retail Experience

- Through my design decisions and UI/UX expertise, I've created an engaging, user-centric shopping platform that combines aesthetics with functionality.
